

Proposed Panel Title:

Current Southeast Asian Archaeological Researchers and its Relevance in the 21st Century

Convenor:

Kristine Kate A. Lim

University Research Associate, Archaeological Studies Program – University of the Philippines
Diliman

Panel Abstract:

Archaeology is a relatively new discipline in Southeast Asia. While this is so, researches in the last few years have significantly contributed to discussions and a better understanding of early human migration and peopling of the islands, proving how connected the region is to the rest of the world. Besides this, the field is also challenged with its role in today's global context and issues. In this panel, we bring together current archaeological researches on human adaptation to changing environments, disaster risk reduction and cultural heritage, archaeological heritage conservation and management, and the application of new technologies in archaeological data presentation or curation – key and emerging themes in the practice of Southeast Asian archaeology.

Intended Presenters:

1. Name: Hermine Xhaufclair, PhD
Affiliations: Postdoctoral researcher - University of Cambridge,
Museum national d'histoire naturelle
Presentation title:
Human-Forest Interactions in Southeast Asia. A Long Story of Mutual Influences
2. Name: Natasha Andrea Kintanar
Affiliation: PhD Candidate - Institute of Prehistory and Early History and Archaeology of
the Middle Ages, Eberhard Karls University of Tübingen, Germany
Presentation title:
***Lessons from Interpret Europe: Adapting Heritage Interpretation and Alternative
Education in the Philippines***
3. Emil Charles Robles
Affiliation: PhD Candidate/University Research Associate – Archaeological Studies
Program, University of the Philippines – Diliman
Presentation title:
***Paleogeography and Human Mobility in Island Southeast Asia from the Late
Pleistocene through the mid-Holocene***
4. Mylene Quinto-Lising
Affiliations: PhD Candidate – Faculty of Archaeology, Goethe-Universität, Frankfurt,
Senckenberg Research Institute's ROCEEH program
***Designing Archaeological Resources Management Applications for the Prehistoric
Site and Materials of Rizal, Kalinga, Philippines with Dmanisi, Georgia and
Sangiran, Indonesia as Models***
